

# Series 9, Contemporary Double DishDrawer Dishwasher

Series 9 | Contemporary

Wash one drawer while you load the other, with minimal bending. Or wash both at once, with room in each drawer for full size dinner plates.

- Six wash programs, as well as additional Quick wash, Sanitise and Extra Dry options
- Black stainless steel finish with black anodised aluminium handle and buttons
- Flexible racking allows you to customise internal shelves to suit your needs

- Pairs beautifully with our Black French Door Refrigerator

## DIMENSIONS

Height	820 - 880 mm
Width	599 mm
Depth	573 mm

## FEATURES & BENEFITS

### Multiple Wash Types

Wash modifiers allow specialised cycle settings. Quick delivers faster with no performance reduction, Sanitise provides extra protection from bacteria, and Extra Dry is perfect for plastic dishes.

### Ease of use

DishDrawer™ Dishwashers are as easy to open and close as kitchen drawers, making loading dishes simple. Flexible racking allows you to make adjustments to fit in a variety of dishes.

### Beauty Of Choice

As much a high performance appliance as a design component, the black DishDrawer™ Dishwasher brings a touch of sophistication to your kitchen, on its own or part of a matching kitchen appliance set.

### Independent Washing

With the ability to use both drawers independently and select different wash programs, the DishDrawer™ Dishwasher can wash everything from fine glass and crystal to heavily soiled pots and pans.

### True Half Load

Each drawer holds a true half load for small, fast dish washing that won't waste water. Both drawers operate independently so two wash cycles can operate simultaneously to allow for varying loads.

### Quiet Performer

The DishDrawer™ Dishwasher does its job without making a fuss - running at a very low decibel rating, they produce little in the way of noise.

## SPECIFICATIONS

### Accessories (included)

Cutlery basket	•
Kickstrip	true
Knife clip and multipurpose clip	•

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
